

Help the earth and environment

Environmental science is the exploration of human-environment interactions across continents and cultures. This environmental science and policy program studies the history of how humans have modified the planet and teaches you how to guide the future of human influence on the environment. You'll get a firm foundation in the fundamentals of both the science and policy of the environment and its impact on humanity. You'll become an active participant in environmentally-themed initiatives—locally and abroad—and develop your own solutions to current problems pertaining to wildlife, conservation, environmental health, ecology and marine science.

This environmental science degree is the perfect stepping stone for a career in either education or law. Besides your core classes, you'll study public policy, human behavior, general chemistry and ethical decision-making. All of these courses will help you make the best decision for our planet's future.

Environmental science and policy information

- Environmental politics and justice, risk and public health and policy
- Ways humans have affected the environment and what the future holds
- Global human culture and how different populations have interacted with their environments

“Stop trying to be normal. If you’re normal, you’re forgettable. Be that annoying person who calls professors you want to study with. Tell them you read about their work and want to be part of it.”

Melanie Mendez '14, California, B.S. in biology

About Lynn

Lynn University is one of the nation's most innovative and global universities. Located in Boca Raton, Florida, alongside booming business centers and beautiful beaches, we are focused on one thing, **preparing students for success.**

Our professors concentrate on the art of teaching – making good students great and great students remarkable.

Our award-winning iPad®-powered learning puts a transformational learning companion into the hands of students.

And our graduates? They've gained the intellectual flexibility and global experience to take the lead in an ever-changing world.

We are focused on one thing: Preparing students for success.
